SUMMARY

Data Engineer & BI Professional with 7+ years of experience building enterprise data platforms and analytics solutions using Microsoft Fabric, Databricks, Snowflake, Azure, SQL, Python, and Power BI. Experienced in developing scalable ETL/ELT pipelines, lakehouse architectures, semantic models, dashboards, cloud migrations, and AI-powered analytics for Fortune 500 organizations including Adobe, Swire Coca-Cola, and Amazon.

EXPERIENCE

Data Engineer

Adobe

March 2026- Aug 2026, Remote

- Designed and supported enterprise data integration workflows using SnapLogic, SQL Server, Salesforce, and Dynamics 365, enabling reliable data movement across business systems.
- Configured and managed Microsoft Fabric workspaces, access, and analytics environments to support enterprise reporting and AI-enabled use cases.
- Built and optimized Power BI semantic models for enterprise data platforms, enabling scalable self-service reporting and analytics.
- Developed AI-powered reporting agents using Claude, Codex, and Copilot to automate weekly KPI reporting, executive summaries, and operational insights.
- Automated data integration and reporting workflows across enterprise systems, reducing manual processing and improving data availability.
- Built proofs of concept using Microsoft Fabric, Databricks, and PySpark to evaluate data platform modernization, scalability, and enterprise integration approaches.

Analytics Engineer / Business Intelligence Analyst

Swire Coca-Cola

July 2023- March 2026, Draper, Utah

- Spearheaded logistics analytics using SQL, Python, and APIs to integrate Samsara, BlueJay, and SAP data, driving a **23%** reduction in transportation costs through route optimization and vendor performance improvements.
- Built scalable data pipelines and semantic models using Snowflake, Azure Synapse, and dbt, enabling efficient processing of large logistics and sales datasets.
- Developed Power BI KPI dashboards for supply chain and distribution teams, tracking OTIF, Cases/Stop, and Out-of-Stock %, enabling data-driven operational decisions.
- Improved route adherence from **55% to 72%** through logistics analytics, KPI monitoring, and data-driven improvements.
- Designed Power BI forecasting solutions using SQL and forecasting logic, reducing unnecessary delivery stops by **12.5%** and saving millions in operational expenses.
- Automated finance reporting and expense analytics using SQL, Power Automate, Power Apps, and Concur, improving processing efficiency by **40%** and reducing reporting errors by **60%**.
- Performed sales analytics including VendSmart analysis, churn prediction, and customer retention modeling to guide product placement and renewal strategies.

Data Engineering - Intern

Swire Coca-Cola

February 2023- July 2023, Draper, Utah

- Migrated on-prem SQL Server data to Snowflake on Azure, improving scalability and performance.
- Built ETL pipelines using SQL, Python, Azure Data Factory, and Synapse Analytics to transform data for enterprise reporting.
- Automated data integration workflows using Power Automate and SQL triggers, streamlining delivery to analytics platforms.
- Migrated Power BI reports from on-premises to cloud-based Snowflake sources, optimizing SQL models to reduce report processing times by **12%**.

Last Mile Analyst

Amazon Development Centre

July 2020- August 2022, Hyderabad, India

- Improved operational efficiency across NA and EU distribution centers using SQL and Amazon Redshift to analyze logistics issues, identify root causes, and deliver actionable insights to leadership.
- Led a cross-functional initiative to ingest and integrate real-time traffic data via INRIX APIs using Python, Apache Airflow, and AWS Lambda, publishing enriched datasets to dashboards and mobile applications.

- Developed last-mile logistics dashboards using Amazon QuickSight and SQL, improving team performance by **20%** and customer satisfaction by **15%**
- Applied statistical modeling with Python (pandas) to analyze feedback and routing patterns, reducing route inefficiencies by **25%** and delivery delays by **10%**.
- Enhanced map quality and delivery accuracy by processing Rabbit Feedback data using Python and Amazon S3 and integrating results with OpenStreetMap for route optimization

Business Analyst

Byju's **Feb 2020- May 2020, Hyderabad, India**

- Analyzed sales and call-center data using SQL and Dataverse to identify conversion patterns and improve lead performance.
- Conducted price elasticity, revenue analysis and built Tableau dashboards to track funnel metrics and support data-driven decisions.
- Developed Power Apps solutions integrated with Dataverse and SQL to optimize lead prioritization, call routing, and workflows.

Analyst
Concentrix

July 2018- Sept 2019, Visakhapatnam, India

- Processed healthcare claims for Aetna using NLP, Neural Language Models (NLM), SQL, and Python to extract, classify, and validate unstructured and semi-structured data at scale.
- Built analytical dashboards using SQL and BI tools to analyze customer trends across regions, age groups, and disease categories.
- Conducted price elasticity and premium impact analysis using SQL and Python to prevent revenue leakage, improve retention, and optimize pricing strategies.
- Designed claims-processing automation workflows using rule-based frameworks and complexity scoring, reducing manual review and operational bottlenecks.

SKILLS

- **Languages:** SQL, Python, PySpark, Spark SQL
- **Cloud & Data Platforms:** Microsoft Fabric, Azure, Databricks, Snowflake, AWS
- **Data Engineering:** ETL/ELT, Lakehouse, Data Warehousing, dbt, Airflow, Azure Data Factory, Synapse Analytics, Delta Lake
- **Analytics & BI:** Power BI, Semantic Models, Tableau, Amazon QuickSight
- **Integration & Automation:** REST APIs, SnapLogic, Power Apps, Power Automate
- **Enterprise Systems:** SAP, Salesforce, Dynamics 365
- **DevOps:** Git, GitHub, Azure DevOps, CI/CD

Selected Projects

- [Microsoft Fabric Migration – Migrated legacy data workloads to Microsoft Fabric Lakehouse, pipelines, and semantic models.](#)
- [Round Table AI – Built a multi-perspective AI decision platform with expert debate, dynamic verdicts, and shareable insights.](#)
- [Transportation Optimization Dashboard – Built logistics analytics solutions that drove a 23% reduction in transportation costs.](#)

EDUCATION

Master of Science, Information Systems

University of Utah • Salt Lake City, UT • 2023

Post Graduate Diploma, Project & Supply Chain Management

Narsee Monjee Institute of Management Studies (NMIMS) • Mumbai, India • 2022

Bachelor of Technology, Electrical & Electronics

MVGR College of Engineering • Visakhapatnam, India • 2018

CERTIFICATIONS

Fabric Data Engineer Associate	Microsoft • 2025
ITIL® Foundation Certificate in IT Service Management	PeopleCert • 2025
Power BI Data Analyst Associate	Microsoft • 2023
Azure Database Administrator Associate	Microsoft • 2023
